Examiner's Amendment

In the claim:

In claim 2, line 2, the phrase "vice versa" has been changed to --vice versa--.

In claim 3, line 22 (the last line of claim 3), the phrase "at a predetermined" has been changed to --within a predetermined--.

In claim 6, line 10, the phrase "computer and," has been changed to --computer, wherein

within a predetermined amount of time, license plate numbers are deleted from memory when a match is not determined; and, --.

Claim 7 has been changed to:

(amended) A traffic law enforcement system

wherein at least two enforcement units having license plate readers are spaced apart a given distance:

Art Unit: 2736

wherein at least one central computer receives inputs, including license plate numbers of vehicles which pass the license plate readers, from the at least two enforcement units;

wherein the at least two enforcement units and the at least one central computer cooperate to calculate an average velocity of a vehicle which passes between the at least two enforcement units, using the inputs of a) the identity of enforcement units which transmitted matching license plate numbers, and b) time lapsed between the transmission of the matching license plate numbers to the central computer,

wherein at least three enforcement units cooperate with the at least one central computer to identify a vehicle whose average velocity is calculated across the path of the at least three enforcement units and in which at least two images of the vehicle are recorded at different locations for evidentiary purposes; and [The traffic law enforcement system of claim 6] wherein:

the system stores license plate numbers and place and time information into a central database until a match is found within a predetermined amount of time, and,

when a match is found, the system captures and stores a graphical image and associated information, and then reinjects license plate data into the central database together with an associated flag which points to the captured video image of the first match so that a subsequent violation can be associated with a prior violation, thereby enabling law enforcement officials to easily select among stored evidence, and choose the evidence which they may use to support a citation for violating the speed limits while at the same time minimizing the storage resources required of the system.--
